BUCKSKIN STRIKE IS WONDERFULLY RICH

The new strike made a few days ago in the Bell-Prout lease, at the north end of the Buckskin National Gold Mining company's property, in the National district, is proving to be a bonanza.

The strike was made at a vertical depth of about 400 feet and was in a drift from the bottom of a winze sent down from the tunnel level by the leasers. The first report was when the drift cut into the vein and only a small part of the orebody was showing. Now the full width of the vein has been determined. It is five feet wide and all rich ore samples of ore show it to be wonlerfully rich in gold and silver. Three samples of the ore assayed at the Winnemucca assay office gave the following results: No. 1, \$96 in gold and \$50.30 in silver, or a total of \$146.30 o the ton; No. 2, \$30 in gold ind \$79.95 in silver, or a total of \$199.95 to the ton; No. 3, \$438 in cold and \$70.59 in silver, or a total of \$508 59 a the ton Humboldt Star.

WINTER CONDITIONS OF **ELECTRIC SERVICE**

The most trying conditions of service are now being met by the hydro-electric power companies. The snow is falling to the depth of many feet in the High Sierras where the power plants of this Company are located. Winter storms are continually burdening the transmission lines with tons of ice and sleet.

To insure constant service to the public, employes are at all times patrolling these lines, regardless of weather conditions. Every energy and resource is being used and no expense spared. in order that the public may be uninterrupted in its use of electricity for these necessities which no other service can supply, or those luxuries which can be had only by electric service.

The Nevada-California Power Company
